

Multi-Asset Market Monitor

June 2017 Commentary

Equities	Alternatives	Fixed Income
International Equity markets (2.41% ¹) continue to outperform their North American counterparts due to greater economic improvement and earnings growth. Meanwhile the S&P/TSX continues to lag in Q2. Although the Canadian economy remains sound, investor appetite for Energy and Bank stocks has waned.	Direct Private Assets can witness return enhancement around the time of appraisals, which was this month for the infrastructure portfolio. Direct Real Estate and Private Mortgages indicate that broader private markets continued their stable return profile.	Bonds rallied during the month due to sluggish US data and mounting concern over Trump's administration's ability to execute pro-growth policies. Meanwhile Corporate bonds saw their strong performance reverse with spreads widening over the month.
