

Ontario Government to Cancel Renewable Contracts

The importance of a global infrastructure approach

This summer the Ontario government announced plans to cancel 758 renewable energy contracts in an effort to reduce electricity bills. The announcement follows a provincial election that saw the PC party sweep into power on a number of headline-grabbing promises. ([Global News: July 13, 2018](#))¹

This announcement highlights the regulatory risk associated with infrastructure projects, and in our opinion the importance of global diversification.

From Brexit to Making America Great Again, populist governments are being brought to power on a wave of nationalist sentiment. Infrastructure spending programs make for easy political targets due to large price tags and societal benefits that are spread over decades. As a result, it can be tempting for parties to gain political points by labeling these programs as “wasteful spending” committed by outgoing governments.

Ironically, when these same parties come into power they often view infrastructure spending as a path to prosperity and growth. Given how vital infrastructure is to an economy’s growth, it is unlikely to see any slowdown in infrastructure investment despite the rising populist sentiment. In fact, it’s estimated by 2040 that over US\$94 trillion of new investment will be required globally.²

in 2017.³ This funding comes as governments have sought new ways to reduce debt, pay for growth and incentivize new technologies. From privatization of public assets, to new funding mechanisms such as P3s, to tax incentives and feed-in-tariffs for renewable energy, infrastructure spending programs have been grabbing headlines and creating debate that has led to increased scrutiny.

Figure 2: Capital Raised in Unlisted Infrastructure Funds

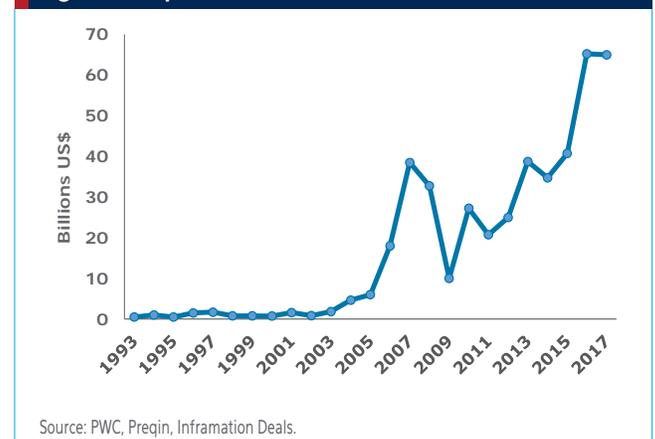

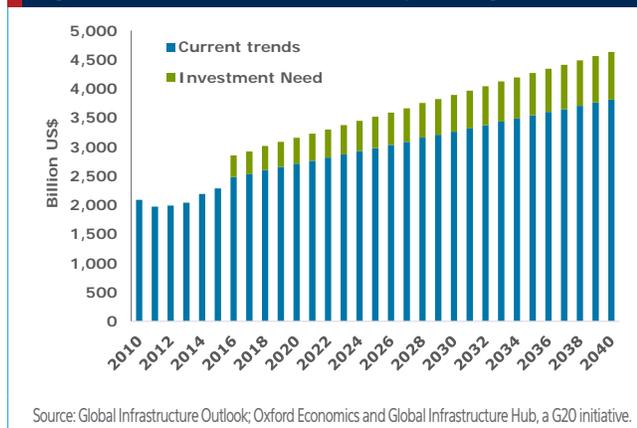

Figure 1: Global Infrastructure Spending

Infrastructure has only been recognized as a credible institutional asset class within the past three decades. In this period, private infrastructure funds have gone from raising less than US\$1 billion per year to over US\$60 billion

Infrastructure investors must acknowledge that their investments are highly visible and closely tied to government decisions. Even in the most stable regimes, political risk cannot entirely be mitigated. Most infrastructure investments will likely outlive a number of governments and, therefore, top-down analysis can be as important as a bottom-up review of individual investments. Aspects of a jurisdiction, such as the rule of law, public sentiment, and macro-economic tailwinds like trade, are all important in understanding the risks of an infrastructure investment. Possibly more important in this climate is the diversification of these risks through a global portfolio of assets. Diversification and portfolio construction is just as important in a portfolio of private infrastructure assets as it is for stocks and bonds.

As for Ontario, in our view, infrastructure will continue to be an important aspect of public and private investment, and for select sectors, Ontario remains an attractive jurisdiction to invest in with low unemployment and continued expected growth.

The Greystone Infrastructure Fund (Canada) LP and the Greystone Infrastructure Fund (Canada) LP II (the "Feeder Funds") invests in units of a master fund, the Greystone Infrastructure Fund (Global) LP (the "Master Fund"). The Master Fund invests in the allowable infrastructure investments outlined in its Investment Policy.

Master: The Master Fund is priced monthly in U.S. dollars and includes any working capital within the Master Fund, as well as the current U.S. dollar value of the most recent valuation of the underlying investments. Valuations of the investments held in the Master Fund are done semi-annually in the local currency of the investment. Interim valuations may be done as the result of special situations. At each monthly pricing period, the investment valuations are converted to U.S. dollars at the rate in effect at the pricing date.

Feeder: The Feeder Funds are priced monthly in U.S. dollars and reported in Canadian dollars to clients and include working capital held within the Feeder Funds as well as the updated monthly value of the units held in the Master Fund. The value of the Feeder Funds' investment in the Master Fund is determined based on the updated monthly price of the Master Fund.

Greystone claims compliance with the Global Investment Performance Standards (GIPS). A GIPS compliant presentation is available upon request. Greystone has been independently verified for the period from January 1, 2000 to December 31, 2017. The verification report(s) is/are available upon request. Verification assess whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

In Canada, Greystone is a registered portfolio manager, exempt market dealer and investment fund manager. Greystone is registered as an investment adviser with the Securities and Exchange Commission in the United States.
